

Dear executives/board members/powers that be:

Your company is an important part of the library ecosystem, but I must protest your company's support of the Stop Online Piracy Act. As a library professional, I believe that SOPA would lead to censorship and create a chilling effect that is counter to principals of free speech.

I believe that in the long run, supporting this legislation will drive a wedge between your company and the people who buy your products or services.

Speak out now and revoke your company's support of SOPA.

Signed,
Your customer and LSW member

NOTE: I speak only for myself and not my employer, the ALA or any other person, entity or cabal.
